Make Money While You Sleep

Introduction:

Joe is your average American. He studied hard to get the 'right' job.

He puts in the time at work. He tries really hard. He truly applies himself. He gives 100%.

Still, at the end of every month, Joe is barely able to make ends meet. It seems his bills just get bigger and bigger while his income... well... you know the story about the median American household income.

According to US government figures, the median household income has actually shrunk and shows no sign of recovering anytime soon.

Not surprisingly, Joe, like most other middle-class Americans and according to government reports, are one emergency away from bankruptcy and personal financial disaster.

What went wrong?

After all, Joe works hard. He plays the game by the rules. He doesn't cut corners.

Joe thought he was chasing The American Dream the way it was supposed to be chased.

Sadly, he has no retirement savings. He is up to his gills in mortgage payments and other debts and is now living paycheck to paycheck.

Most Americans can relate to the Story of Joe. Indeed, Most Americans ARE living Joe's life.

If you're struggling, you must have reached a point where you asked yourself: 'Is this all there is to it?' or 'What am I doing wrong?!'

You might think that there's nothing else besides the monthly ordeal of trying to keep your head above water. You might be thinking that you're doomed to a life where the more you earn, the more you spend.

It might seem that this ordeal never ends and there is really NO POINT to it all.

Frustrating, right?

You might even be asking yourself if there is a BETTER WAY to dig yourself out.

Part 1:

Understanding YOUR reality: Working for money is FOR AVERAGE AMERICANS

If you think about it hard enough, the word 'Job' actually stands for 'Just Over Broke.'

If your only source of income is your job, you're in trouble. Seriously.

Why?

Your job wasn't meant to make you rich. In fact, it was meant to pay you just enough to keep you producing for someone else. Your job pays you just enough so you can stay in place and MAKE SOMEONE ELSE RICH.

Why are most jobs ENGINEERED to FAIL?

Unless you're the CEO of General Electric or Apple, most jobs are engineered to FAIL to make you rich. How? You have to keep working to get paid.

If you stop working, you stop getting paid.

Clear?

If you don't believe me, try stopping work. Call in sick. Burn through your vacation leave pay. What happens after you burn through those benefits?

That's right-you get fired and you don't earn any more money.

Jobs require constant work. You're caught like a monkey pulling a lever to get a reward. You stop pushing that button or pulling that lever, the rewards stop.

To make matters worse, even if you put in your very best effort at your job, the best you can hope for is a raise. Don't get your hopes up-most raises are barely enough to cover inflation. You're simply treading water. At this rate, you're not going anywhere financially. You're certainly NOT GETTING RICH.

To truly gain FINANCIAL FREEDOM, you have to wake up to this reality: Working for money is for AVERAGE AMERICANS.

Now, you might be thinking about alternatives like SELF-EMPLOYMENT or running YOUR OWN BUSINESS.

Wrong answers!

Seriously. Both lead to dead ends.

Even if you're a lawyer or doctor with your own small practice, you are still stuck in the same treadmill as the typical American caught in the rat race. You're still selling your time.

Sure, you dictate the price which you charge for your time but you are still selling your time.

If you don't work, you don't get paid. You have to actively put in work or you don't get paid. It's not like patients or law clients would throw money your way in exchange for you doing nothing.

Self-employment is simply glorified employment. You just swapped bosses. Instead of selling your time to your boss, you put yourself in charge of selling your time. You're still selling your time and you're really no better off. In fact, unlike a JOB where you can rely on a regular paycheck, self-employment can be a feast or famine situation depending on how good you are at getting clients.

With self-employment, you trade the 'security' of a regular paycheck for the 'freedom' of working for yourself. Sadly, for most Americans who try this, the tradeoff is usually not worth it.

How about owning your own Business?

Surely, owning a business and finding someone else to run it is better than a J-O-B or self-employment, right? Well, technically, yes... but BARELY.

When you run a business, you have to deal with employee drama. Even if you hire managers and supervisors to oversee your employees, you'll still have to deal with interpersonal drama. Whenever you deal with other people, drama is always not far behind.

Running your own business can also be very random. Some months, you have tons of business. Other months, you are running on fumes. In fact, given the true state of the economy, most businesses are in the latter category.

How can that be? You have to stress about inventory, rent, insurance, and a wide range of other costs and issues that wear on your nerves and grind down your profit margins.

Did you know that most small businesses in the US are simply struggling to get by? Most could barely pay their rent. In fact, after factoring in the meager salary their owners take, most small businesses don't produce enough profit.

Indeed, the profit margins of so many American small businesses are so minuscule you'd think they aren't worth the bother. And they aren't! They don't produce enough return on effort!

How about INVESTING?

By this point, you're beginning to see the sad financial state of most middle class Americans. Since most struggle with jobs, self-employment, and business ownership, maybe traditional INVESTING is the way to a bright financial future?

Sadly, for most people, the answer is: **WRONG**, try again!

Simply put, making money through traditional investments is too **RISKY**. That's right-you can **LOSE YOUR SHIRT!**

While the Dow Jones seems to be in a hot streak lately, you have to time your entry and exit in stock positions or else you might find yourself holding an empty bag... for a long time. Don't be one of those poor suckers who buy in at the 'peak' of the market.

Your worst **LOSS** in the stock market is not the decrease of your portfolio value but **YOUR WASTED TIME**. When you get stuck in a mediocre, under-performing, or losing stock, you have essentially **FROZEN YOUR MONEY**. It's not going anywhere. You could have invested it into something else that would have **INCREASED YOUR NET WORTH**. See what's wrong with this picture?

Wait, there's more bad news with traditional investing: bad cash flow. Unlike other opportunities, you can't tap your stock investments for ready cash to take care of your monthly bills, expenses, and liabilities. For the most part, **YOU'RE MONEY IS STUCK!**

Do you now understand the financial reality for most Average Americans? Everything clear?

I understand if you're feeling a bit discouraged, distressed, or even depressed at this point....

Thankfully, there's a BETTER WAY. There IS a solution to all the Income Generation DEAD ENDS we covered above. The solution? Make money through our simple to implement Automated Income Generation system.

Why getting involved with your own “AUTOMATED Passive Rewards System” may be your best move yet!

To make money while you sleep with the system I will tell you about, you have to have a minimum of \$300 but \$500 to \$1000 works best. We even have an option to make more money by sharing this system with others.

Now, you might be hemming and hawing. You might be thinking that \$500 is quite a chunk of change. You might think that's too expensive.

Well, if you were to add up all the cash you spent on junk food, junk snacks, useless trinkets you buy on impulse, you'd realize that you quickly BLOW THROUGH \$500 easily month after month.

Put it this way, you don't think twice when you have to pay Uncle Sam your taxes come April 15. You also don't make a fuss when you have to fork over sales tax whenever you buy anything. Well, think of this \$500 as a TAX.

But instead of the regular tax you pay that is often wasted by the government or goes to programs you may not agree with, this \$500 'tax' you're paying WORKS ONLY FOR YOU. You're investing in your very own financial freedom.

This is ONE tax you should gladly pay because YOU are its ONLY beneficiary! Since most of your money is already wasted through impulse buys and taxes, voluntarily pay this 'tax' for a brighter financial future for you and your family. Impose this 'tax' on yourself and you'll be sure to see the benefits-unlike the huge list of regular taxes you pay!

Are you ready to spend a modest one-time \$300 to \$1000 for a gateway out of the rat race? Are you ready to pay a small fee for a new lease on your financial life? Isn't \$500 a small price to pay for finally saying good-bye to the sad end-of-the-month ritual of scrounging around for cash to pay your bills?

If you answered YES, there's even more great news with this system. Read the next part, it's an eye-opener.

Instead of toiling, you could be traveling and exploring the world. You could also be out on a glorious golf course enjoying yourself at the links. In other words, you could be out **LIVING LIFE** instead of **WASTING YOUR LIFE** working or worrying.
